 HOUSING
 PROGRAMS

**EMERGENCY HOME REPAIR
 ACCESSIBILITY DESIGN
 AGING IN PLACE**

ASSIST Inc is an independent, nonprofit Community Design Center founded in 1969. ASSIST provides housing repair assistance to low-income households and accessibility design to persons with disabilities.

We also offer architectural design, community planning and development assistance to nonprofit and community groups.

EMERGENCY HOME REPAIR

Plumbing | Heating | Roofing | Electrical
Door & Window Repair | Extermination

Critical home repairs are provided free of charge to senior citizens, home owners earning less than 50% of area median income, and, in limited cases, renters. Funds are provided by the Community Development Block Grant program.

- **Emergency Home Repair** – ASSIST pays 100% of the repair costs, with no liens placed on the home as a result of the repair.
- **Local, Reliable Work** – ASSIST hires local, licensed and insured contractors to perform the repair work so quality is assured.

ACCESSIBILITY DESIGN

Ramps | Low-Rise Steps | Railings
Bathroom Retrofits | Doorway Modifications

ASSIST provides free design assistance to anyone undertaking safety and accessibility related projects in their home. Households who earn up to 60% of median income may qualify for financial assistance to have these projects realized.

- **Assessment and Design** – ASSIST provides free home assessment and design options for practical accessibility modifications
- **Construction Assistance** – Construction plans can be provided for self-help or contractor built projects. For qualifying households, accessibility modifications can be paid for through the Emergency Home Repair program.

AGING IN PLACE

Grab Bars | Lever Hardware
Swing Clear Hinges | Tub Cuts

Preventative safety improvements allow us to remain in our homes and avoid injuries as we age. Households earning up to 80% of the area median income may qualify for financial assistance for these improvements.

- **Safety Evaluations** – ASSIST can perform an assessment of your home and suggest possible safety modifications.
- **Preventative Improvements** – For qualifying households, ASSIST can fund preventative improvements to your home so that existing infirmities don't become future disabilities.
